Personal Profile

Full stack Web developer with more than 5 years background experience in ecommerce.
I successfully launched an ebay and amazon shop with a starting capital of £500 and we have now passed a combined sales figures of £100 000/year.
I successfully completed BS honours in web Systems development in the past. I am a lifelong student who embraces the digital world . I have knowledge in a variety of scripting languages such as Javascript , debugging processes and also multimedia web tools. I am capable of efficiently coding web applications with user experience in mind . I am a hard worker with attention to details and a team player. I am seeking the opportunity to learn more and accommodate myself with more complex web applications.

Projects

Group Project: Media Streamer
Github: https://github.com/pfansi/media-streamer
Deployed App: https://pfansi.github.io/media-streamer
- It is an application that will generate random movies or books based on a selected genre/category. It is taking away the frustration of jumping to several streaming platforms to find something you like to entertain yourself.
- **Role:** Worked on researching appropriate server side API , designing the user interface and refactoring javascript code files.
- **Tools Utilised:** HTML , CSS , JavaScript, JSON, Google Books API, tMBD APi, Streaming Availability API, TailwindCss Framework, Figma.

Group Project: Team Task Manager
Github: https://github.com/AidKool/team-task-manager
Deployed App: https://teamtask-manager.herokuapp.com/login

- This Project is about developing a Team Task Manager application using MVC (Model-View-Controller) technique that will allow a manager and employees to allocate tasks.
- **Role:** Contributed to the front end application design(Figma, HTML, CSS). Implemented functionalities for the login , logout and Project pages, both at the front and back end.
- **Tools Utilised:** HTML , CSS , JavaScript, JSON, Handlebars, Sequelize ORM, Express, MySQL, Node.js, Figma.

Team Project : Track My Move
Github: https://github.com/Allan-Ngwenya/track-my-move
Deployed App: https://track-my-move-backup.herokuapp.com/login

- This is a MERN stack with GraphQL application which allows users to keep track of their property purchase. The user keeps on track of this process by the help of a roadmap.
- **Role:** Created the logo, and the application front page. Added client side react components. implemented the roadmap functionality using Material-UI. I contributed to creating the application GraphQL Schemas, TypeDefs & Resolvers files and linked them to the MongoBD database. Contributed to coding the Node.js backend files.
- **Tools Utilised:** HTML , CSS , JavaScript, React, MongoDB, Apollo GraphQL, Heroku, Node.js.
